Congresswoman Debbie Mucarsel-Powell  
114 Cannon HOB  
Washington, D.C. 20515  
(202)225-2778

Dear Congresswoman Mucarsel-Powell:

The Board of Directors of the Florida Keys Fishing Guides Association ("FKFGA") wish to congratulate you on your recent subcommittee assignments. By being a member of these subcommittees you will be in position to follow through with your campaign promises of being a champion for the Everglades and the protection of our water sources.

We agree with you in your recent announcement that you will have the opportunity to help keep our "country safe and our waters clean, and increasing our resilience to fight against climate change."

We believe that with your leadership and representation of south Miami and the Florida Keys along with Congressman Brian Mast's similar determination to accelerate Everglades Restoration, that together, you will be a beacon of bi-partisan support when it comes to sending clean, fresh water to the Everglades National Park and Florida Bay.

Established in 1956, the FKFGA is one of the oldest conservation organizations in the state of Florida fighting for clean water and a bright future and we applaud your efforts on this front.

Thank you for your support,

Capt. Steve Friedman  
*Commodore, Florida Keys Fishing Guides Association, Inc.*
